PERSONAL PROJECTS

BarberQueue
- **BarberQueue** is a **React Native** mobile app designed to optimize salon experiences by introducing a token system that reduces wait times and improves service efficiency.
- The app provides real-time queue updates, integrated loyalty rewards, and secure payment options.
- It's built with **Node.js** and **Express.js** on the backend, using **MongoDB** for data management, ensuring a seamless and user-friendly experience.

News-Web
- This News-Web application is developed using **ReactJS.** The web app fetches data from **NewsAPI** using asynchronous fetching and delivers up-to-date worldwide news to users.
- Developed "News-web," a captivating news platform utilizing **React hooks** for optimized state management and seamless user experience. I have added news search functionality.
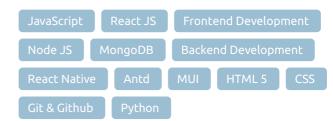

WORK EXPERIENCE
